Dear Atkore BIM Toolbar user,

Please follow the steps below to install the latest version of the Atkore BIM Toolbar:

1. Remove the previous version of the Atkore toolbar by navigating to the Control Panel, selecting "Uninstall a program", and then choosing the Atkore toolbar from the list of installed programs.
2. If the issue persists, delete the following directory:
    C:\ProgramData\Autodesk\ApplicationPlugins\AtkoreToolbar.bundle

Note: you may need a permission from your IT department to complete the steps above.
We promise a smoother installation process moving forward (after this version 2.6.1).

Please don't hesitate to reach out to us at atkoretoolbar@atkore.com if you have any questions or feedback.
