

CPD SEMINAR

Channel & The Importance of Specifying Compliant Systems

This course provides a comprehensive understanding of load transfer and its impact on support systems, along with the correct use of channels, fittings, and accessories as part of a complete warranted system.

Delegates will learn best installation practice, selecting the right solution for the environment, and how to ensure product traceability back to the steel mill (The Golden Thread). The course also covers the use of digital design tools and adhering to relevant standards and regulations for safe, compliant installations.

Course Overview

Content

- Overview of channel systems: Guidance selecting the right solution for the environment and reduced maintenance plus, importance of deflection limits & load testing
- Safety, strength & integrity of system installations (best practise) by using components designed & tested as a complete system plus, safety when using products
- Compliance with UK & international testing, certification, standards, regulations & full traceability (Golden Thread)
- Importance of competent installers for workplace safety & hazard prevention

Ideal For

- Architects
- Product Specifiers
- Electrical Contractors
- Electrical Consulting Engineers

Duration

- 1-Hour Including Q&A

Location

- Online or In Person
