

CPD SEMINAR

Specifying Rail Compliant Cable Management Systems

This CPD-accredited course provides an overview of rail compliant cable management, with guidance to selecting the most suitable system for a specific project.

Designed for specifiers and installers, the course covers selecting suitable cable management systems, product options, and installation best practices. It addresses bespoke requirements for non-standard sizes and accessories, ensuring safe use through fully tested, integrated systems. Understanding the importance of compliancy and regulation is also covered including traceability.

Course Overview

Content

- Rail cable management challenges & suitable systems
- Installation & best practice: Using nuts, bolts or screws to secure
- Safety when installing & using products (performance tested)
- Compliance, standards & regulations, testing, certification & full traceability (Golden Thread)
- Selecting the right materials & finishes in different environments, for durability & longevity
- The performance of Cable Management systems in the event of a fire

Ideal For

- Architects
- Product Specifiers
- Electrical Contractors
- Electrical Consulting Engineers

Duration

- 1-Hour Including Q&A
