

# Allied Tube & Conduit PVC Coated Conduit, Fittings & Accessories

Product Catalog

**Atkore™**  
Allied Tube  
& Conduit

## Choose Allied Tube & Conduit...

### Affordable Corrosion Protection for Harsh Environments

Allied PVC Coated Conduit, Fittings and Accessories are easy to install and require little to no maintenance. At a *fraction of the cost* of stainless steel conduit, Allied PVC Coated Conduit provides the best protection for electrical raceway systems in extreme environments found in applications like oil and gas, mining and industrial wastewater treatment.

#### The Right Product for Your application:

- PVC Coated Rigid Steel and Aluminum
- UL Listed and NEMA RN1 Compliant - no exceptions

Call an Allied expert or visit [allieddeg.us](http://allieddeg.us) to better protect your electrical raceway system. 800-225-7473

## Introduction

### Broadest Selection. Better Response. Best Performance.

Allied Tube & Conduit PVC coated conduit, fittings and accessories, offer extensive protection for electrical conduit systems placed in highly corrosive environments. All Allied Tube & Conduit products feature a 40 mil PVC-coated exterior with a 2 mil Urethane-coated interior and threads. Every fitting incorporates our flexible overlapping sleeves, ensuring a tight seal at each connection.

### Performance and Safety Tested

Allied Tube & Conduit PVC coated rigid conduit with special bonding agent has passed the ETL SEMKO High Temperature H2O PVC Coating adhesion test and the UL series of 4 tests simulating real world weathering of PVC coated conduit. Allied Tube & Conduit ETL-verified and UL-6 Listed PVC coated conduit will last substantially longer than non-tested conduit, and is a safer, more robust conduit system that ensures less downtime, with lower replacement costs.

Best in class quality control, count on Allied Tube & Conduit for conduit systems expertise, best-in-class product performance and state-of-the art facilities to support today's project requirements.

### Superior Corrosion Protection

Allied Tube & Conduit's quality assurance program complies with industry standards established by UL, ANSI and NEMA:

- All Allied Tube & Conduit products are UL Listed and NEMA RN1 compliant
- UL6 Listed with both zinc coating and PVC coating as primary coatings
- UL PVC adhesion performance tested (DYJC.E226472) where conduit is sequentially subjected to air oven conditioning and exposure test, resistance to salt spray (fog) and adhesion test of ANSI/UL6

### Markets Served

Allied's specially formulated PVC provides superior protection so that conduit systems in bridges and tunnels will hold up longer with lower maintenance costs, wastewater treatment facilities can expect less damage to pipes, tanks, pumps and electrical conduit systems, and petrochemical refining plants will experience fewer arcs, less sparking and safer day-to-day operations.

#### Mining Industry

The mining industry's harsh environment along with the aerobic and anaerobic microorganisms present in mining water contribute heavily to the corrosion and failure of electrical systems in modern mining. Mining facilities all over the world have come to rely on Allied's complete line of PVC conduit, conduit bodies, device boxes, junction boxes, liquidtight connectors and hubs, fittings and accessories for the solutions that prevent threats to mining operations. Available in both galvanized rigid steel and rigid aluminum, Allied PVC conduit systems are easy to install and proven to provide corrosion protection at a fraction of the cost of stainless steel conduit.

## Markets Served

### **Oil & Gas Industry**

Allied conduit systems are designed to withstand extreme temperatures, harsh, toxic flammable and acidic elements, commonly found in the oil and gas industry. PVC coated conduit is often used for its affordability, ease of installation and most importantly, its ability to protect against unscheduled plant shutdowns, lost production, high maintenance repair costs and imposed fines due to corrosion. Allied PVC Coated Conduit Systems are highly resistant to oils, grease, acids, alkalis, and moisture making it ideal for the petrochemical industry.

## Markets Served

### Transportation and Infrastructure

Most bridges were built for a 50-year design life. Due to corrosion, now, state highway departments are faced with repairing and maintaining bridges beyond their original design lives.\*

\*NACE International – Highways and Bridges

Experts recommend protective and custom coating for corrosion control and maintenance on conduit systems to extend the service life of a bridge beyond its original life span. Controlling corrosion in the transportation and infrastructure market with hot dip galvanizing and advanced PVC coatings in PVC Coated conduit systems lessens the effects of costly shutdowns for repairs in infrastructure and public structures.

With ETL-verified and UL-6 Listed PVC coated conduit, including Allied's special bonding agent and specially formulated urethane internal coating, Allied provides the longest available product life cycle for bridges and tunnels. Proven to last substantially longer than conduit that has not passed the rigorous demands of ETL Verification testing, Allied PVC-coated steel conduit is a safer, more robust conduit system that ensures less downtime, with lower replacement costs.

## Markets Served

### **Wastewater and Water Treatment Plants**

Wastewater treatment plants process and handle some of the most corrosive solids and liquids throughout the process engineering world. These corrosive elements cause damage to pipes, tanks, pumps and electrical conduit systems after prolonged use. Corrosion for drinking water and sewer systems creates repair costs of replacing aging infrastructure, leaks, corrosion inhibitors, external coatings for sun or heat exposure, and cathodic protection. PVC coated conduit systems from Allied can be integrated within a system and protect the workings of the WWTP from corrosive damage.

Allied offers a complete line of PVC coated conduit, fittings and conduit accessories for the protection of electrical conduit systems in highly corrosive environments.

Wastewater and Water Treatment Plants benefit from PVC coated conduit systems:

- PVC coating on galvanized rigid steel and aluminum conduit
- UL listed, NEMA RN1 compliant, and ETL verified
- UL6 Listed with both zinc and PVC primary coatings, providing two layers of corrosion protection
- UL PVC adhesion performance tested (DYJC E226472)
- Specially formulated urethane internal coating provides longest available product life cycle

## Conduit

### Standard and Custom Color PVC-Coated Conduit, Fittings, Strut and Accessories

#### Features:

- Bright, standard bold color options for instant critical identification
- Custom color match for aesthetics or corporate branding
- The ONLY ETL-Verified Color Conduit on the market
- Made in the USA
- UV resistant formulation
- Eco-Friendly Process

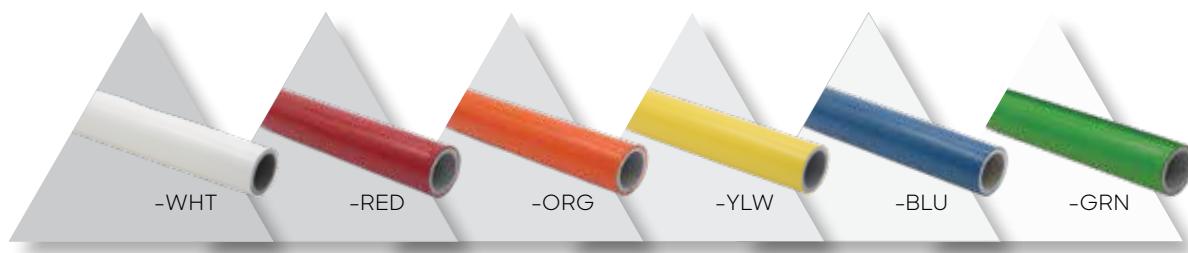

#### Application Considerations for Color Conduit

- White - food processing, pharma and other washdown applications.  
Easy hygienic inspection
- Red - emergency circuits, circuit identification
- Orange - safety found in construction, transportation and bridges
- Yellow - high voltage, caution areas, special equipment
- Blue - data lines, aesthetics
- Green - aesthetics

For standard color orders, add these suffixes to the end of the part number:

-WHT -RED -ORG -YLW -BLU -GRN

# Conduit

## ETL-Verified PVC Coated Rigid Conduit

### Features:

- Exterior PVC coating thickness is a minimum 0.040"
- Interior urethane coating thickness is a minimum 0.002"
- Specialized corrosion resistant coating provided on threads
- Sizes available are ½" to 6"
- Color coded thread protectors
- Couplings shipped with conduit are packaged separately
- Hot Dipped Galvanized (HDG) conduit

### Standards:

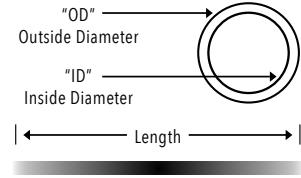

Allied PVC Coated Conduit is UL Listed with both the PVC coating as a primary protection and the Hot Dipped Galvanized (HDG) zinc coating as the primary protection per UL6. PVC coated conduit is restricted for use with threaded fittings only (threadless connector not permitted).

- UL/cUL listed, File Number DYJC E226472
- ETL PVC-001 adhesion performance test verified / Cert. of Conformance Number: 104646226CRT-002
- Exceeds NEMA RN1 and ANSI C80.1 Standards

### Applications:

Allied PVC Coated Conduit is used for highly corrosive environments to protect electrical circuits in harsh environments.

The coating is Intertek SEMKO ETL PVC-001 Verified for superior corrosion and mechanical protection. Ground continuity is maintained throughout the installation.

## PVC Coated Aluminum Conduit

### Features:

- Exterior PVC coating thickness is a minimum 0.040"
- Interior urethane coating thickness is a minimum 0.002"
- Specialized corrosion resistant coating provided on threads
- Sizes available are 1/2" to 6"
- Color coded thread protectors
- Couplings shipped with conduit are packaged separately
- Aluminum Rigid Conduit 6061 T1

### Standards:

Allied is UL listed with both the PVC coating as a primary protection and the zinc coating as the primary protection per UL6A. PVC coated conduit is restricted for use with threaded fittings only (threadless connector not permitted).

- UL/cUL listed in accordance to UL6A and ANSI C80.5
- UL/cUL listed rigid ferrous metal conduit with polyvinyl chloride coating verified for PVC adhesion performance
- Complies with NEMA RN1
- UL File Number E230584

### Applications:

Allied PVC Coated Aluminum Rigid Conduit is used for highly corrosive environments. The coating will provide corrosion protection and mechanical protection. Ground continuity is maintained throughout the installation.

# Split Couplings

## Split Couplings

### Features:

- Exterior PVC coating thickness is a minimum 0.040"
- Interior urethane coating thickness is a minimum 0.002"
- Sizes available are  $\frac{1}{2}$ " to 6"
- The length of the sleeve extension(s) shall be at least equivalent to the nominal conduit size for sizes  $\frac{1}{2}$ " - 2"
- For sizes 2  $\frac{1}{2}$ " - 6", the length of the sleeve extension(s) shall be at least 2"
- Stainless steel hardware included

### Standards:

- UL Standard 514B
- CSA Standard: C22.2 No. 18

### Applications:

Allied PVC Coated Split Couplings are used to connect two pieces of conduit where the conduit cannot be turned. Allied split couplings are PVC coated for corrosion protection.

Part Number	Trade Size (in)	Metric Size (mm)
PV0500TCC1	$\frac{1}{2}$	20

PV5000TCC12	5	600
PV6000TCC14	6	860

All dimensions are for informational purposes only \*Tolerances +/- 5%

# Reducing Couplings

## Reducing Coupling

### Features:

- Exterior PVC coating thickness is a minimum 0.040"
- Interior urethane coating thickness is a minimum 0.002"
- Steel: Sizes available are  $\frac{3}{4}$ " to  $\frac{1}{2}$ " to 3"
- The length of the sleeve extension(s) shall be at least equivalent to the nominal conduit size for sizes  $\frac{1}{2}$ " - 2"
- For sizes 2- $\frac{1}{2}$ " - 2- $\frac{1}{2}$ " - 5", the length of the sleeve extension(s) shall be at least 2"
- Sealing sleeves extender 1 pipe diameter or 2 inches, whichever is greater, beyond all female openings

### Standards:

- National Electric Code/ CEC
  - REC 21 - 01210
  - Class I, Division 1 & 2, Groups A, B, C, D
  - Class III
- UL Standard: 886
- CSA Standard: C22.2 No. 30

### Applications:

Allied Reducing Couplings are used to join conduit and fittings of different sizes. They are provided with different size sleeves to match the fittings thread sizes.

Part Number	Trade Size (in)	Weight per 100 (Lb)
PV0700REC21	$\frac{3}{4}$ - $\frac{1}{2}$	20

## Standard Elbows

### Features:

- Exterior PVC coating thickness is a minimum 0.040"
- Interior urethane coating thickness is a minimum 0.002"
- Specialized corrosion resistant coating provided on threads
- Sizes available are  $\frac{1}{2}$ " to 6"
- Available in 90, 60, 45, and 30 degree bends

### Standards:

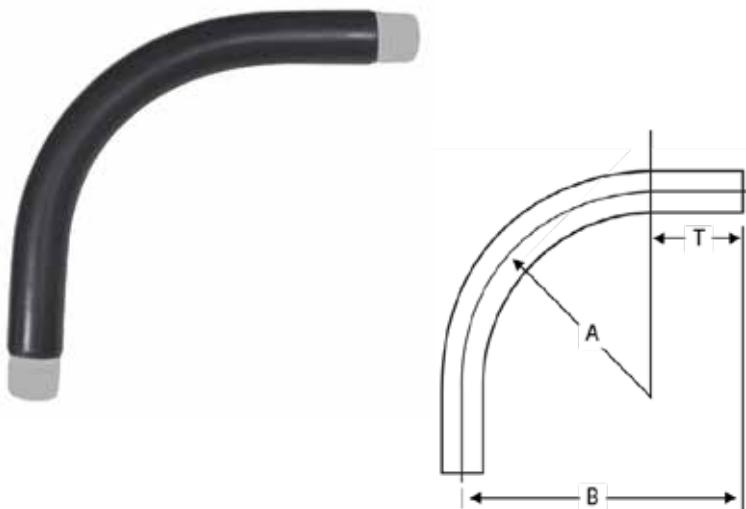

- UL/CUL listed in accordance to UL6 & ANSI C80.1 Standards
- UL/cUL listed rigid ferrous metal conduit with polyvinyl chloride coating verified for PVC adhesion performance
- Complies with NEMA RN1
- UL File Number E226472 (Steel)
- Alum UL E230584 (Aluminum)

### Applications:

Allied PVC Coated GRC 90° Standard Elbows are available in various degrees as required. All elbows are manufactured from Allied PVC coated conduit and meet all applicable standards.

### Options:

- Available in any degree of bend from 5° to 90°, and special radius

## Standard Elbows

## Special Radius Elbows

### Features:

- Exterior PVC coating thickness is a minimum 0.040"
- Interior Urethane coating thickness is a minimum 0.002"
- Sizes available are  $\frac{1}{2}$ " to 6"
- Available in 90, 60, 45, and 30 degree bends

### Standards:

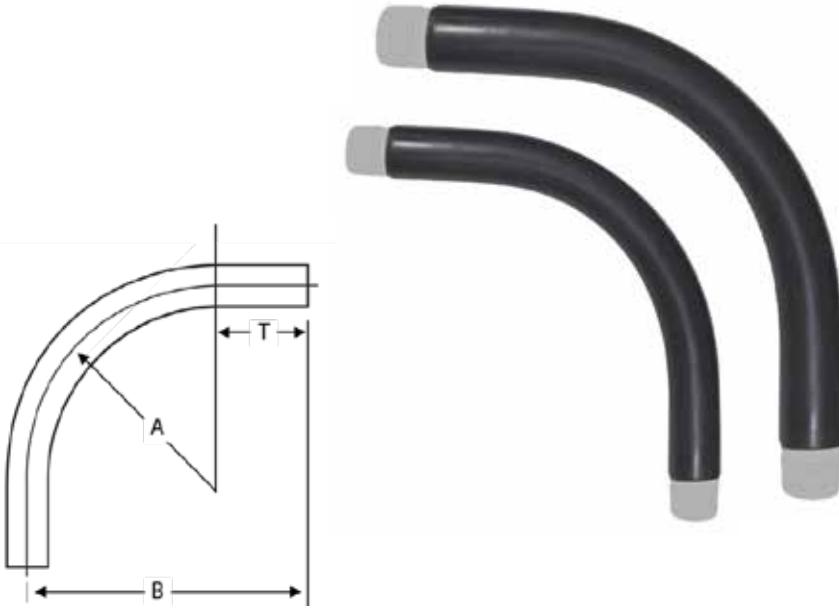

- UL/CUL listed in accordance to UL6 & ANSI C80.1 Standards
- UL/CUL listed rigid ferrous metal conduit with polyvinyl chloride coating verified for PVC adhesion performance
- Complies with NEMA RN1
- UL File # E226472

### Applications:

Allied Coated Elbows are available in special radius dimensions and in various degrees as required. All elbows are manufactured from Allied PVC coated conduit and meet all applicable standards.

### Options:

- Available in any degree of bend from 5° to 90°, and special radius

## Elbows

### Yard Elbows

#### Features:

- Exterior PVC coating thickness is a minimum 0.040"
- Interior Urethane coating thickness is a minimum 0.002"
- NPT thread with end-cap on each end
- Sizes available are ½" to 4"

#### Standards:

- UL/CUL listed in accordance to UL6A & ANSI C80.5 Standards
- UL/cUL listed rigid ferrous metal conduit with polyvinyl chloride coating verified for PVC adhesion performance
- Complies with NEMA RN1
- UL File # E226472

#### Applications:

Allied PVC Coated Yard Elbows are used in stub up applications and feature 40 mil PVC exterior coating with 2 mil urethane coating on the interior.

# Conduit Bodies - Form 8

## Conduit Bodies - Form 8

### Features:

- Exterior PVC coating thickness is a minimum 0.040"
- Interior urethane coating thickness is a minimum 0.002"
- Specialized corrosion resistant coating provided on threads
- Fittings are supplied with plastic encapsulated stainless steel screws

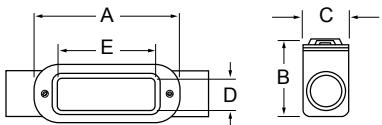

### Standards:

- UL Standard 514B
- UL Listed File # E307133
- CSA Standard: C22.2 No. 18
- Verified NEMA 4X Rated

### Applications:

Allied offers the full line of Form 8 PVC Coated Conduit Bodies. All fittings are supplied with PVC coated cast iron covers. The sleeved threaded ends offer complete protection against corrosion while maintaining full ground continuity throughout the installed system.

## Conduit Bodies - Form 7

### Features:

- Exterior PVC coating thickness is a minimum 0.040"
- Interior urethane coating thickness is a minimum 0.002"
- Specialized corrosion resistant coating provided on threads
- Fittings are supplied with plastic encapsulated stainless steel screws

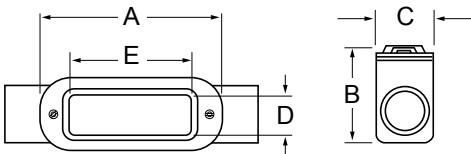

### Standards:

- UL Standard 514B
- CSA Standard: C22.2 No. 18

### Applications:

Allied offers the full line of C Form 7 PVC Coated Conduit Bodies. Conduit Bodies are installed in conduit systems to; act as pull outlets for conductors being installed, provide openings for making splices in conductors, and to provide access to conductors for maintenance and future system changes. All fittings are supplied with PVC coated cast iron covers. The sleeved threaded ends offer complete protection against corrosion while maintaining full ground continuity throughout the installed system.

## Conduit Bodies – Form 7 Aluminum

### Form 7 Aluminum

#### Features:

- Exterior PVC coating thickness is a minimum 0.040"
- Interior urethane coating thickness is a minimum 0.002"
- Specialized corrosion resistant coating provided on threads
- Sizes available are  $\frac{1}{2}$ " to 3"
- Fittings are supplied with plastic encapsulated stainless steel screws

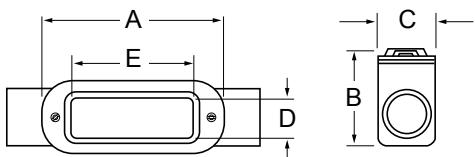

#### Standards:

- UL Standard 514B
- CSA Standard: C22.2 No. 18

#### Applications:

Allied offers the full line of Form 7 PVC Coated Aluminum Conduit Bodies. Conduit Bodies are installed in conduit systems to; act as pull outlets for conductors being installed, provide openings for making splices in conductors, and to provide access to conductors for maintenance and future system changes. All fittings are supplied with PVC coated cast aluminum covers. The sleeved threaded ends offer complete protection against corrosion while maintaining full ground continuity throughout the installed system.

# Conduit Hubs

## ST Conduit Hubs

### Features:

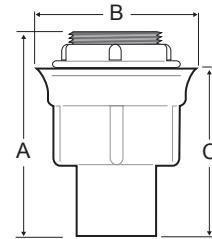

- Exterior PVC coating thickness is a minimum 0.040"
- Interior urethane coating thickness is a minimum 0.002"
- ST available in 12 trade sizes from  $\frac{1}{2}$ " through 6"
- Sealing sleeves on conduit side of hub
- The length of the sleeve extension(s) shall be at least equivalent to the nominal conduit size for sizes  $\frac{1}{2}$ " - 2"
- For sizes  $2\frac{1}{2}$ " - 6", the length of the sleeve extension(s) shall be at least 2"

### Standards:

- UL Listed File #E308159
- NEC/CEC:
  - Class III, Division 1 & 2
  - Class I, Division 2,
  - Class II, Division 1 & 2
  - Class I, Zone 1, AEx e II
  - Class I, Zone 1, Ex e II
- All Screw-tight Hubs are manufactured in accordance with NEMA type enclosures 2, 3, 3R, 4, 4x, 11 and 12

### Applications:

Allied PVC Conduit Hubs are used to terminate conduit runs into electrical enclosures. PVC coating and internal urethane coating provide for superior corrosion protection. Electrical continuity is maintained across assembled joints.

## STTB Conduit Hubs

### Features:

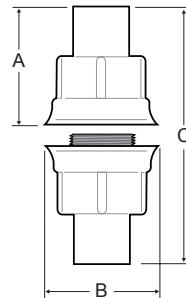

- Exterior PVC coating thickness is a minimum 0.040"
- Interior urethane coating thickness is a minimum 0.002"
- STTB available in 10 trade sizes from  $\frac{1}{2}$ " through 4"
- Sealing sleeves on conduit side of hub
- Molded PVC gasket seals flush with enclosure wall
- Neoprene O-ring gasket provides additional seal
- The length of the sleeve extension(s) shall be at least equivalent to the nominal conduit size for sizes  $\frac{1}{2}$ " - 2"
- For sizes  $2\frac{1}{2}$ " - 4", the length of the sleeve extension(s) shall be at least 2"

### Standards:

- UL 514B
- NEC/CEC:
  - Class III, Division 1 & 2
  - Class I, Zone 1, AEx e II
  - Class I, Zone 1, Ex e II
- All Screw-tight Hubs are manufactured in accordance with NEMA type enclosures 2, 3, 3R, 4, 4x, 11 and 12

### Applications:

Allied PVC STTB style hubs are used to terminate conduit runs through the wall of a sheet metal electrical enclosure.. STTB style hubs are 'Through-Bulkhead' fittings used to pass conduit runs through firewalls or bulkheads up to  $\frac{1}{8}$ " thick.

## STTTB Conduit Hubs

### Features:

- Exterior PVC coating thickness is a minimum 0.040"
- Interior urethane coating thickness is a minimum 0.002"
- STTTB available in 6 trade sizes from  $\frac{1}{2}$ " through 2"
- Sealing sleeves on conduit side of hub
- Molded PVC gasket seals flush with enclosure wall
- Neoprene O-ring gasket provides additional seal
- The length of the sleeve extension(s) shall be at least equivalent to the nominal conduit size for sizes  $\frac{1}{2}$ " - 2"

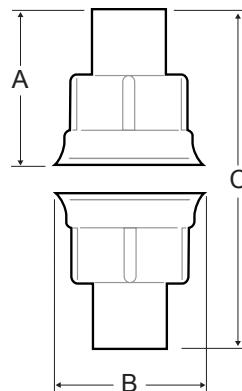

### Standards:

- UL 514B
- NEC/CEC:
  - Class I, Division 2
  - Class II, Division 1 & 2
  - Class III, Division 1 & 2
  - Class I, Zone 1, AEx e II
  - Class I, Zone 1, Ex e II
- All Screw-tight Hubs are manufactured in accordance with NEMA type enclosures 2, 3, 3R, 4, 4x, 11 and 12

### Applications:

Allied PVC STTTB Style Hubs are used to terminate conduit runs through the wall of a sheet metal electrical enclosure.. STTTB style hubs are "Through-Bulkhead" fittings used to pass conduit runs through firewalls with unlimited wall thickness. (furnished without nipples)

### FD Device Boxes

#### Features:

- Exterior PVC coating thickness is a minimum 0.040"
- Interior urethane coating thickness is a minimum 0.002"
- Sizes available are  $\frac{1}{2}$ " to 1"
- Sealing sleeves on all conduit openings
- Modified boxes are available upon request
- All available covers are supplied with PVC coating

#### Standards:

- UL Listed Standard 514B File #E307133
- CSA Standard: C22.2 No. 18

#### Applications:

Allied Type FD PVC Coated Device Boxes offer corrosion protection to conduit systems and accommodates wiring devices and access for taps and splices. Covers are available separately. Electrical continuity of the conduit system is maintained across assembled system.

Part Number	Trade Size (in)	Weight per 100 (lb)	A (in)	B (in)	C (in)	D (in)	Aluminum Item Number

### GUA Junction Boxes

#### Features:

- Exterior PVC coating thickness is a minimum 0.040"
- Interior Urethane coating thickness is a minimum 0.002"

#### Standards:

- National Electric Code:  
Class I, Division 1 & 2, Groups C, D, Class III
- UL Standard 886
- ANSI Standard C-33.27
- CSA Standard: C22.2 No. 30
- NEMA/EEMAC 3, 4

#### Applications:

Allied GUA Style Fittings are available in a variety of shapes and dimensions. GUA Aluminum style boxes are used in hazardous locations. All GUA Aluminum style boxes are supplied PVC coated with PVC coated covers and a seal between the coating of the boxes and the coating of the covers.

## UNF Unions

### Features:

- Exterior PVC coating thickness is a minimum 0.040"
- Interior Urethane coating thickness is a minimum 0.002"
- Sizes available are  $\frac{1}{2}$ " to 6"
- The length of the sleeve extension(s) shall be at least equivalent to the nominal conduit size for sizes  $\frac{1}{2}$ " - 2"
- For sizes  $2\frac{1}{2}$ " - 6", the length of the sleeve extension(s) shall be at least 2"
- A sealing form is provided between the mating surfaces of the unions

### Applications:

Allied PVC Unions are used in conduit connections when the conduit cannot be turned. Allied unions are provided with two sealing sleeves and a sealing form in the mating joint.

### Standards:

- NEC/CEC:
  - UNF 105-305  
Class I, Division 1 & 2,  
Groups A, B, C, D Class III
  - UNF 905-1005

## UNY Unions

### Features:

- Exterior PVC coating thickness is a minimum 0.040"
- Interior Urethane coating thickness is a minimum 0.002"
- Sizes available are  $\frac{1}{2}$ " to 6"
- The length of the sleeve extension(s) shall be at least equivalent to the nominal conduit size for sizes  $\frac{1}{2}$ "- 2"
- For sizes 2  $\frac{1}{2}$ "- 6", the length of the sleeve extension(s) shall be at least 2"
- A sealing form is provided between the mating surfaces of the unions

### Applications:

Allied PVC Unions are used in conduit connections when the conduit cannot be turned. Allied unions are provided with two sealing sleeves and a sealing form in the mating joint. For Allied UNY, Allied provides a UNF with a close nipple.

- Sizes available are  $\frac{1}{2}$ " to 4 "
- The length of the sleeve extension(s) shall be at least equivalent to the nominal conduit size for sizes  $\frac{1}{2}$ "- 2"
- For sizes 2  $\frac{1}{2}$ "- 4", the length of the sleeve extension(s) shall be at least 2".
- Sealing sleeve is provided on plug hub (patching compound recommended on top of plug)
- Mating sealing forms are provided on all caps
- Sealing sleeves on all conduit openings

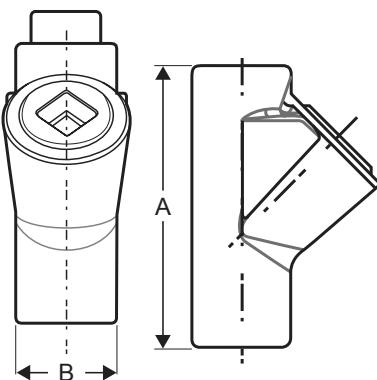

### Standards:

- NEC/CEC:
  - EYS1-3, 11-31, 16-36, 116-316  
Class I, Division 1 & 2,  
Groups A, B, C, D Class III
  - EYS41-101, 416-1016  
Class I, Division 1 & 2,  
Groups B, C, D Class III
  - EYS29, 4-014, 46-0146  
EZS1-8, 16-86  
Class I, Division 1 & 2,  
Groups C, D Class III
- UL Standard: 1203
- CSA Standard: C22.2

### Applications:

Allied PVC Coated Sealing Fittings are used in hazardous locations to prevent flame and gas from continuing to travel through the conduit system. PVC coating provides corrosion protection. A sealing compound should be used on the interior after wiring. Compound supplied by the original fitting manufacturer.

## Expansion Fittings

## Expansion Fittings

XD Expansion/ Deflection Fitting	106
XJG Expansion Joints	107
XJGD Expansion Joints	108

# Expansion Joints

## XD Expansion/ Deflection Fitting

### Features:

- Axial expansion or contraction up to  $\frac{3}{4}$ "
- Angular misalignment in any direction to 30°
- 40 mil carbon gray PVC exterior coating
- 2 mil light gray urethane interior coating
- XD in 10 trade sizes from 1" through 5"
- Sealing sleeves

### Applications:

Allied XD Expansion/Deflection Couplings are used with PVC coated rigid conduit to accommodate axial expansion, angular misalignment and parallel misalignment. They feature an internal bonding jumper. PVC coating and internal urethane coating provide for superior corrosion protection. Electrical continuity is maintained across assembled joints.

Galvanized Part Number	Trade Size (in)	A (in)	B (in)

# Expansion Joints

## XJG Expansion Joint

### Features:

- 40 mil PVC black coating
- 2 mil urethane interior coating
- Available in 9 trade sizes from  $\frac{3}{4}$ " through 4"
- Sealing sleeves

### Standards:

- XJG EXPANSION JOINTS - 4" TRAVEL: Product Dimensions

### Applications:

Allied XJG Expansion Joints features an internal bonding jumper and facilitates horizontal movement of the conduit system of up to 4". PVC coating and internal urethane coating provide for superior corrosion protection. Electrical continuity is maintained across assembled joints.

Galvanized Part Number	Trade Size (in)	A (in)	B (in)	Nominal Weight (Galv.) (lb)

# Pulling Elbows

## LBD Style Pulling Elbows

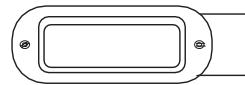

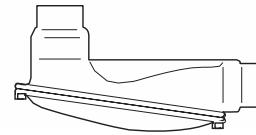

### Features:

- Exterior PVC coating thickness is a minimum 0.040"
- Interior Urethane coating thickness is a minimum 0.002"
- Sizes available are  $\frac{1}{2}$ " to 4"
- The length of the sleeve extension(s) shall be at least equivalent to the nominal conduit size for sizes  $\frac{1}{2}$ " - 2"
- For sizes 2  $\frac{1}{2}$ " - 4", the length of the sleeve extension(s) shall be at least 2"
- PVC seal between fitting and cover

### Standards:

- UL 514 B
- CSA C22.2 No. 18

### Applications:

Allied PVC Coated LBD Pulling Elbows are used to; act as pull outlets for conductors being installed, provide openings for making splices in conductors, and to provide access to conductors for maintenance and future system changes where an extra larger wiring space is required. Sealing mating between cover and fittings are provided.

## BUB Mogul Fittings

### Features:

- Exterior PVC coating thickness is a minimum 0.040"
- Interior Urethane coating thickness is a minimum 0.002"
- Sizes available are 1" to 4"
- Sealing sleeves on all hubs

### Standards:

- UL Standard 514B
- CSA Standard: C22.2 No. 18

### Applications:

Allied PVC Coated Mogul Style Conduit Bodies are used to; act as pull outlets for conductors being installed, provide openings for making splices in conductors, and to provide access to conductors for maintenance and future system changes where an extra larger wiring space is required. They are available in all styles. Sealing mating between cover and fittings are provided.

## PVC Coated Liquidtight Connectors - Straight

### Features:

- Exterior PVC coating thickness is a minimum 0.040"
- Sizes available are  $\frac{3}{8}$ " to 4"
- The length of the sleeve extension(s) shall be at least equivalent to the nominal conduit size for sizes  $\frac{1}{2}$ "- 2"
- For sizes 2 $\frac{1}{2}$ "- 4", the length of the sleeve extension(s) shall be at least 2"
- Available in straight, 45 degree or 90 degree body configurations

### Standards:

- UL Standard 514B
- CSA Standard: C22.2 No. 18

### Applications:

Allied PVC Coated Liquidtight Connectors are used with Liquidtight Conduit to terminate the conduit run. The sleeve on the liquidtight connector is sized specifically to tighten around PVC conduit. Pulling compound is recommended for ease of installation. Fittings are provided with a flexible sleeve on the conduit side and a sealing form on both the box side and the mating part of the gland.

# Liquidtight Connectors

## PVC Coated Liquidtight Connectors - 90° with Ground

### Features:

- Exterior PVC coating thickness is a minimum 0.040"
- Sizes available are ½" to 4"
- The length of the sleeve extension(s) shall be at least equivalent to the nominal conduit size for sizes ½"- 2"
- For sizes 2½"- 4", the length of the sleeve extension(s) shall be at least 2"
- Available in straight, 45 degree or 90 degree body configurations

### Standards:

- UL Standard 514B
- CSA Standard: C22.2 No. 18

### Applications:

Allied PVC Coated Liquidtight Connectors are used with Liquidtight Conduit to terminate the conduit run. The sleeve on the liquidtight connector is sized specifically to tighten around PVC conduit. Pulling compound is recommended for ease of installation. Fittings are provided with a flexible sleeve on the conduit side and a sealing form on both the box side and the mating part of the gland.

# TECK Connectors

## TECK Connectors

### Features:

- Manufactured in aluminum for increased corrosion resistance
- One piece compact design
- Unique Grounding Seal for superior connectivity
- No Disassembly required for easy & fast installations
- Neoprene bushing provides pull out and sealing protection

### Standards:

- NEMA 4, IP65
- Body - Aluminum

### Applications:

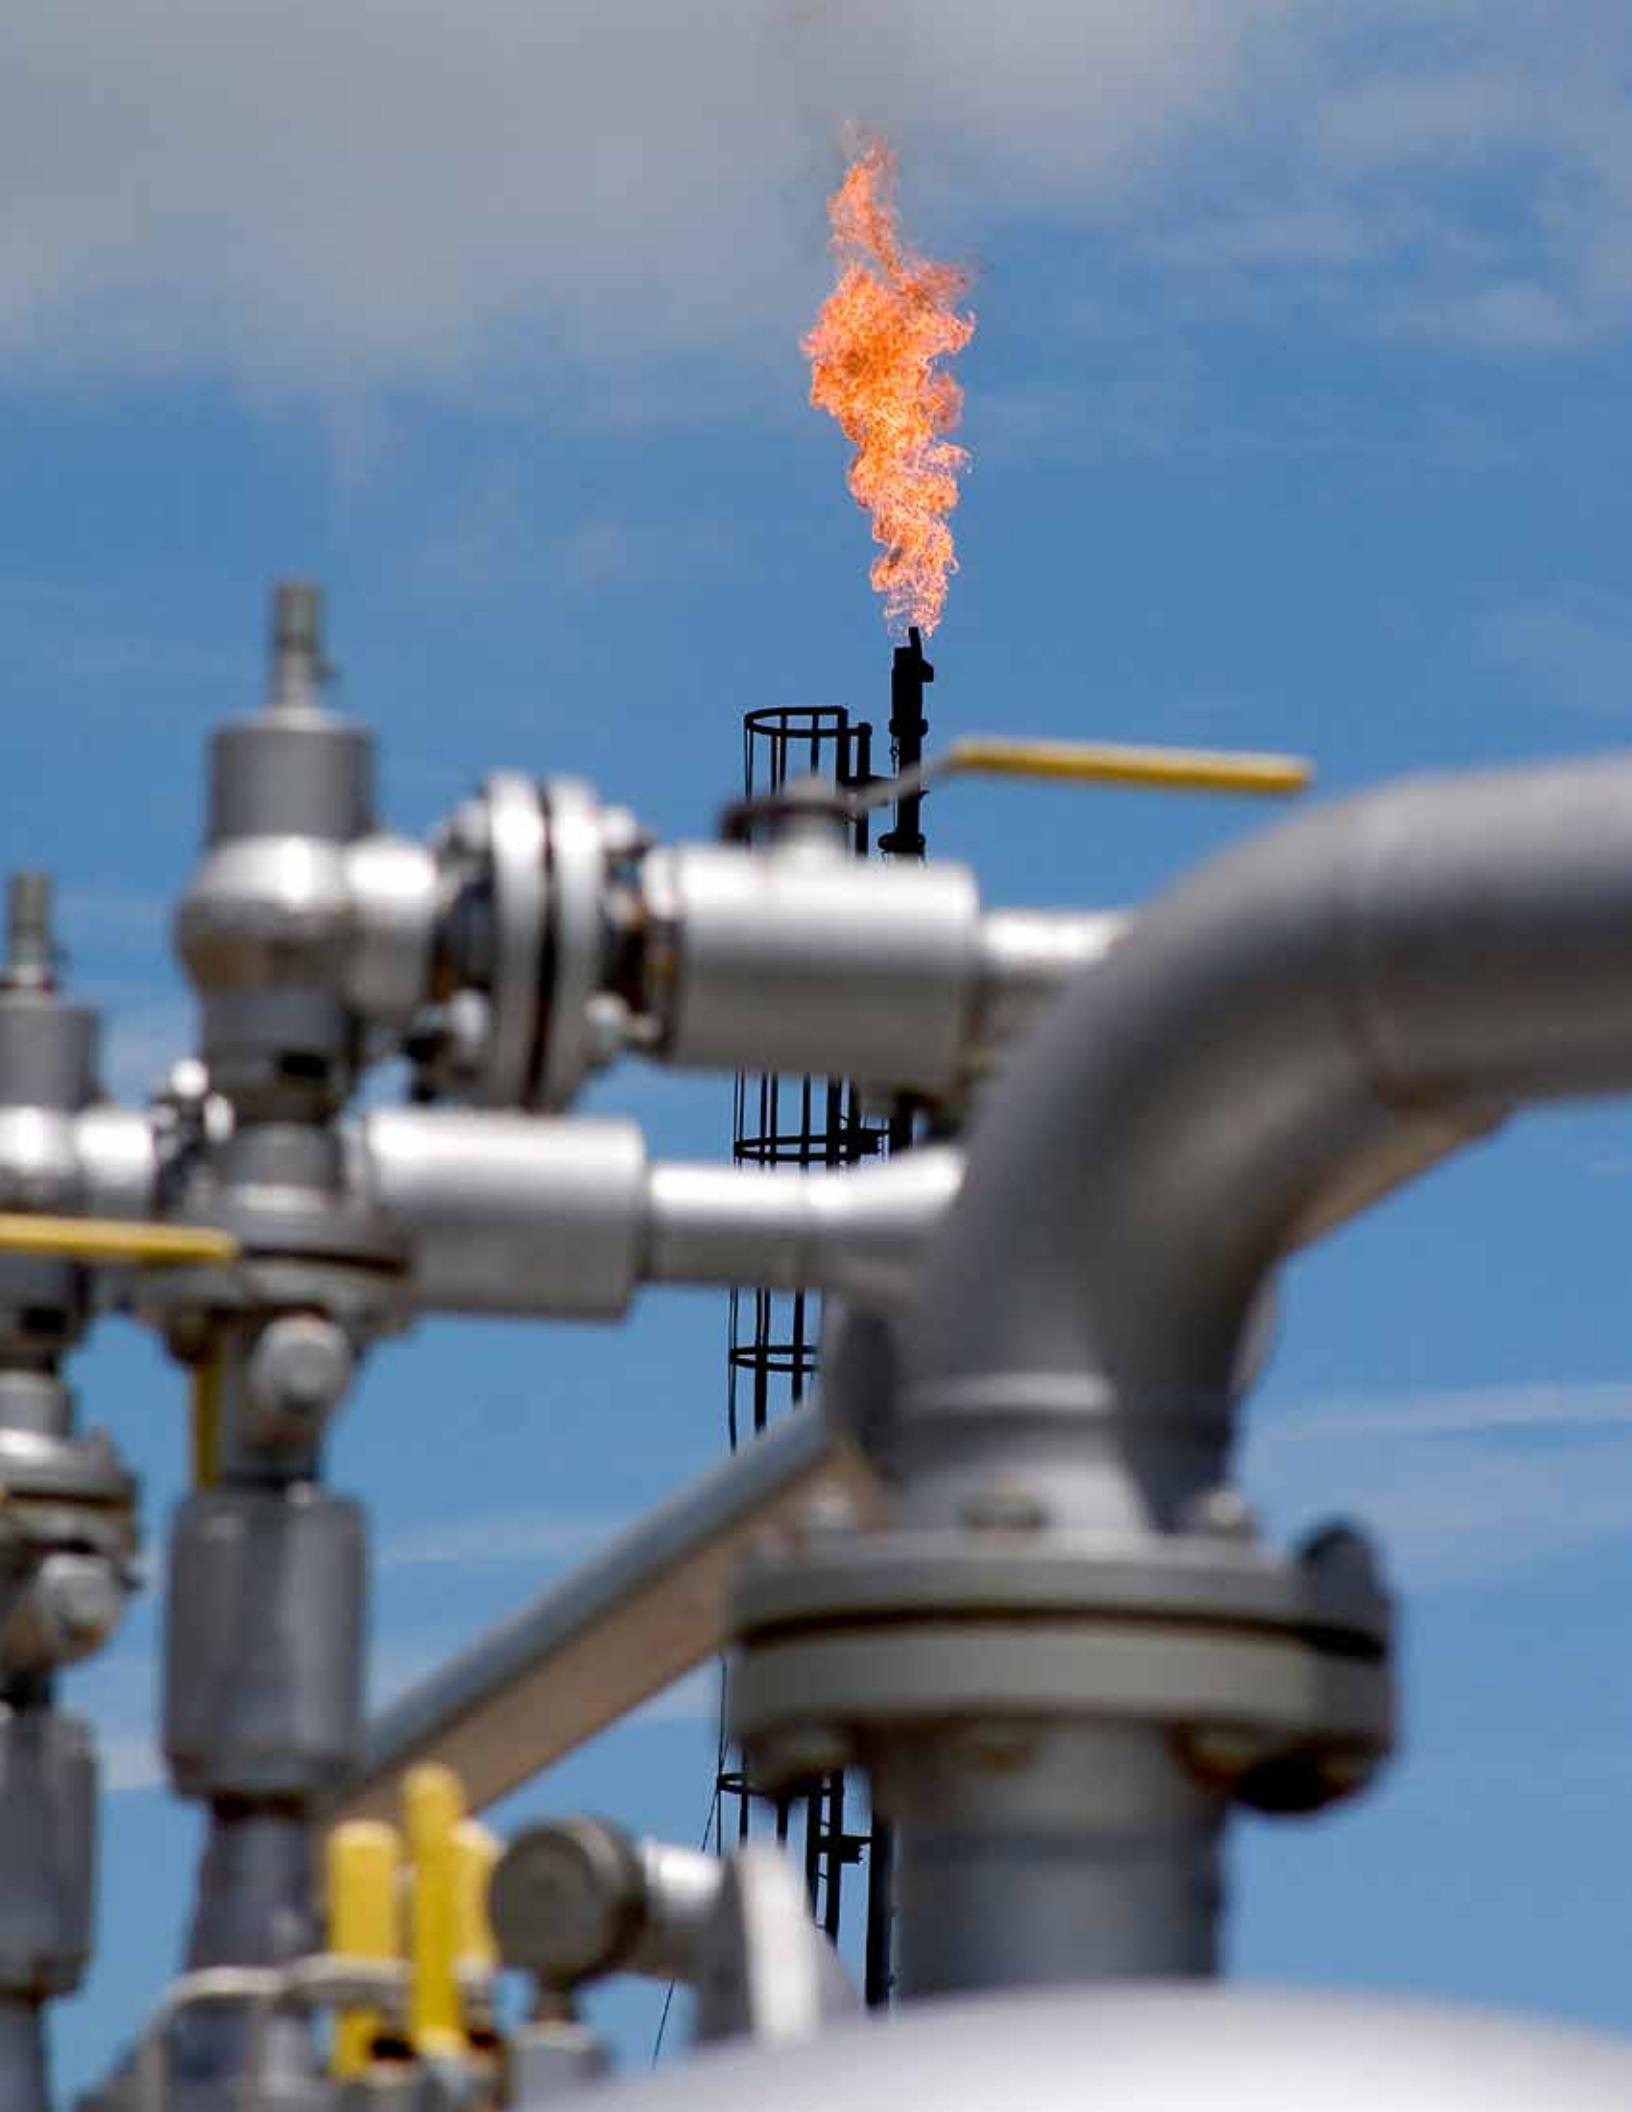

Allied PVC Coated Aluminum TECK Connectors are designed to form a watertight seal around the jacketed metal cable and at the enclosure entry. Rated NEMA 4 and IP 65, these connectors are in-stock in  $\frac{1}{2}$ " to 4" hub sizes.

# Strut & Strut Straps

## PVC Coated Struts

### Features:

- Exterior PVC coating thickness is a minimum 0.02"
- 3 trade sizes and 5 standard styles

### Applications:

Allied PVC Coated Strut is a versatile system of structural elements that can be used to build supports for a variety of applications used in mechanical and electrical installations. Allied offers 5 standard styles of strut: Standard, Back to Back, Slotted Standard, Shallow and Slotted Shallow.

Standard

Back to Back

Slotted Standard

# Strut & Strut Straps

## PVC Coated Strut Straps

### Features:

- 20 mil black PVC exterior coating
- 11 Trade sizes  $\frac{1}{2}$ " to 5"

### Applications:

Allied PVC Coated Strut Straps are used with coated strut to support conduit installations in a variety of configurations. Straps may be used in either vertical or horizontal positions to support conduit. Straps provided with stainless steel hardware. Conduit spacing may be as close together as allowed by the couplings.

# Beam Clamps

## Right Angle, Parallel & Edge Clamps

### Features:

- Exterior PVC coating thickness is a minimum 0.040"
- Right angle clamps are supplied with an adjusted size U-bolt and encapsulated nuts
- Beam clamps are specifically sized to fit Allied PVC coated conduit
- Right angle clamps available in sizes  $\frac{1}{2}$ " to 4"
- Parallel clamps available in sizes  $\frac{1}{2}$ " to 4"
- Edge clamps available in sizes  $\frac{1}{2}$ " to 1"

### Applications:

- PVC Coated Beam Clamps are used to securely support conduit runs by attaching them to beams, angles, trusses and other structural members. They are available in three different styles:
  - Right Angle: attaches the conduit run at a 90 degree angle to a beam or structural member
  - Parallel: attaches the conduit run parallel to a beam or structural member
  - Edge: attaches the conduit run at a 90 degree angle perpendicular to a beam or structural member

### Features:

- Exterior PVC coating thickness is a minimum 0.040"
- Interior Urethane coating thickness is a minimum 0.002"

- Sizes available are  $\frac{1}{2}$ " to 6"
- Color coded threaded protectors for easy identification of conduit size

### Standards:

- UL/CUL listed in accordance to UL6 & ANSI C80.1 Standards
- UL/CUL listed rigid ferrous metal conduit with polyvinyl chloride coating verified for PVC adhesion performance
- Complies with NEMA RN1
- UL File # E226472 & E230584

### Applications:

Allied PVC Coated Nipples are available in all lengths and diameters.  
All nipples are manufactured from Allied PVC coated conduit.

# Aluminum Nipples

## Aluminum Nipples

### Features:

- Exterior PVC coating thickness is a minimum 0.040"
- Interior Urethane coating thickness is a minimum 0.002"
- Sizes available are  $\frac{1}{2}$ " to 6"
- Color coded threaded protectors for easy identification of conduit size

### Standards:

- UL/CUL listed in accordance to UL6 & ANSI C80.1 Standards
- UL/CUL listed rigid ferrous metal conduit with polyvinyl chloride coating verified for PVC adhesion performance
- Complies with NEMA RN1
- UL File Number E230584

### Applications:

Allied PVC Coated Aluminum Nipples are available in all lengths and diameters. All nipples are manufactured from Allied PVC coated conduit.

## Notes

# CERTIFIED INSTALLER PROGRAM

## Course Overview

The Allied Certified Installer Program provides the proper procedures and proven techniques to ensure a quality corrosion resistant conduit system. With proper installation, one can expect a long lasting, superior corrosion resistant conduit system that requires little to no maintenance.

## Course Content

### Standards Review

- Review of the industry standards applicable to PVC coated conduit systems.

### Field Installation Topics

#### Cutting

- Highlight the various tools and techniques for cutting and preparing coated conduit for threading and bending in field setting.

#### Clamping

- Demonstrate proper use of recommended clamping devices and additional tools required to ensure integrity of PVC coating over UL galvanized rigid conduit GRC.

#### Threading

- List the appropriate threading tools and machinery for each trade size of coated conduit.

#### Bending

- Proper bending techniques for custom field bending on coated conduit.

#### Repair

- Recommended procedures for repairing areas of damaged coating on PVC coated conduit systems. Properly repaired coating is essential for a long lasting corrosion resistant system.

### Certification Process

- Written examination.

### Class Curriculum

- 30 minutes - Plant Operations Tour
- 1 hour - Classroom Instruction: Understanding Corrosion and its Consequences and Prevention
- 2 hours - Training Center - Hands-on Training
- 1 hour - Classroom Instruction - Standards, Installation Tools
- 30 minutes - Written Test Administered
- Closing - Presentation of Course Completion Materials

### 65% Practical 35% Theory

#### Qualification

- Allied Certified Installer

#### Who should attend

- Installers and electricians who install Allied PVC Coated Conduit Systems

#### Benefits of attending the course

- Quality installation by trained professionals
